Float Valves

Industrial quality float valves in a variety of materials and sizes.

Our heavy duty float valves are precision CNC machined from 100% Virgin US made plastic. We offer them in PVC material as a stock item. These plastic machined parts are also available in other plastic materials as a custom production run. Our valves feature a rugged design for the harshest of conditions and the o-ring seals are replaceable to provide an extraordinarily long life cycle. Learn about our CNC machining services below.

Our stock sizes are as follows: (listed by Inlet thread x Orifice Dia. x Outlet thread)

- ¾” Float Valve (¾”” x .590” x ¾”)
- ½” Float Valve (¾” x .312” x ½”)
- 3/8” Float Valve (½” X .196” X 3/8”)
