BRITEMAN

Portable Rechargeble Led Light

The BRITEMAN is a powerful & innovative mobile Lighting system useful for emergency lighting. It consists of the light, tripod, lithium battery & transport cart & does not need any generator to support like other kinds of emergency lights.The whole unit is of compact design, which can be carried to remote locations in a specially made container & pulling cart. The lighting system is equipped with lithium battery, which can be charged as & when required and it is ideally suited for all types of emergency situations & locations where electricity is not available.

The total weight of the high powerful LED lighting system is 22kg(including Battery) & it offers greater flexibility. It is equipped with high purity aluminium reflector and the tripod and is easy to assemble & dismantle.

BRITEMAN can illuminate an area of 1500sq feet in no time. One can pack the whole system in few minutes and move it to the next remote area. There is no generator, no carrying of fuel and no wastage of crucial time.

One of the most compact & utility rescue equipment ever created, the BRITEMAN is a remarkable environmental friendly product. It is a lightweight, portable and glare-free illumination system, which is ideal for meeting illuminations needs whenever there is an emergency.

What makes the BRITEMAN light stand out is that it is a compact, robust, sturdy & portable unit, which can be moved by one person and perform even in dark areas with poor visibility.

AIR SYSTEMS

APPLICATIONS:

- Emergency rescues
- Lighting during power outages
- Field Maintenance
- Construction projects
- Field hospitals and emergency shelters
- Road side interventions and extractions
- Flood effected Areas
- Municipalities
- Transmission Line Constructions
- Earthquake relief work
- Train & Road accident sites

FEATURES:

- No Generators. No Fuel carrying
- Compact, Light weight
- Flexible & Ultra Bright
- Robust & Safe
- Portable with carrying cart
- Rechargeable Lithium Battery
- 8 hours work on full charge
- Can be carried & operated by 1 man
- IP65 Protection
- Stand alone on tripod
- Tiny Carrying Case
- Ideal for remote Areas

Sole Distributor:

SB DRIVE POWER LTD
Aman Chambers, New Queens Road
Mumbai - 400 004

Fax No: 022- 3002 4343
Email :sbpower@indiatimes.com

TECHNICAL PARAMETERS:

Model No.	Briteman 300
LED power	30W
Height	1.10M~1.80M
Power efficiency	>0.90
LED emitting efficiency	100Lm/W
Luminaire efficiency	>90%
Effective beam angle	120°
Protection grade	IP65
Life span	>50,000hrs
Fully recharge	About 8hrs
Working in weak light	About 16hrs
Working in strong light	About 10hrs
Inside dimension	700x400x195mm
Total gross weight (including battery)	20kg
Overall dimension	720x450x220mm

Conventional lighting towers needs generators and vehicles for shifting from place to place and to provide power source. BRIGHTMAN is a self sufficient unit and can be positioned at needy locations in couple of minutes. It does not depend on external power. No generator or carrying of fuel is needed for BRITEMAN.

The natural calamities puts us in extremely difficult situations. It adds more problems during night hours, when the rescue work get severely effected needing instant illuminations. BRITEMAN is the ideal equipment.

We in association with leading Global manufacturers offer a range of specialized rescue equipment, which helps in fire fighting, rescue operations and disaster management operations, efficiently and effectively. Our equipments meet all the quality standards backed with after sales service.
