

## Modular Vices

### MV 200/300

Modular vices are widely used on milling machines, grinding machines, electro erosion machines and CNC machining centers. VMC Machine – for efficient precision machining. Horizontal installation – great variability, flexibility and rigidity.

### Scope Of Application:-

- Modular vices are widely used on milling machines, grinding machines, electro erosion machines and CNC machining centers.
- VMC Machine – for efficient precision machining.
- Horizontal installation – great variability, flexibility and rigidity.

### Key Points :-

- Hardened, ground and polished guideway.
- Precision aligning holes in the ground and polished bottom surface.
- Robust base made of case-hardened steel.
- M8 thread for workpiece stopper.
- Pulldown jaws for rigid clamping.
