

Toaster Bag

It is very important for the bag not to touch the heating elements of the toaster. To avoid this, please do not overfill the bag. If the bag comes into contact with the heating elements, it will burn a hole in the bag, although the bag itself will not catch fire.

Connect with Sheerji Industries for high quality durable Toaster bags

Sheerji Industries created a niche position for it in the industry with the manufacturing and supplying of high quality Toaster Bags. With increasing consciousness among people for food qualities Sheerji Industries decided to launch Toaster Bags as one of the key products of the company. To get sandwich perfectly ready after toasting in toaster, use of such bags are mandatory.

One need to Slide a piece of sandwich right into non-toxic, as well as non-stick bag and then get it tossed in toaster. In few minutes time, one can have perfectly toasted and amazingly delicious sandwich. One need to Slide a piece of sandwich right into non-toxic, as well as non-stick bag and then get it tossed in toaster. This bag is also perfect for use if in case one need to use the toaster for making items like Ham sammies, paninis, grilled cheese, pitas, pizza slices, garlic bread, and also to try bacon cooking using toaster.

Role of Toaster bags:

If you are dreaming to enjoy the bite of a well cooked sandwich or toast made in your home toaster then use of the bags manufactured by our experts are a must for you.

- It Protects the breads and sandwiches which you put in your toaster from getting burnt
- It helps in Keeping the toasters as well as ovens clean after completing the toasting process in the toaster

Applications of Toaster bags:

It can be used while working with Toasters, Ovens, or at the time of bread cooking on non stick base. Attention need to be given at the time of placing the bag in the toaster as it should not touch the toaster heating elements. Avoid overfilling of the bag as this may bring the bag in contact with heating base and will create a hole in bag but will not catch fire.

Basic information about the elements use in the making of toaster bags by Sheerji Industries

These bags are manufactured by the experts of Sheerji Industries and are basically sleeves which are made out of PTFE (polytetrafluoroethylene) of superior quality. It is a synthetic material which is quite similar to that of Teflon. These bags are of reusable nature and can be used for several times to toast the sandwich in toaster. All that need to be done is to rinse it with water or clean them using a dishwasher.
