

Vibro Screen

Gayatri Magnet is manufacturing wide range of Vibro Screen or Gyro Screen or Gyratory screen that are the spherical screens operating with special Vibro Motor imparting vibration in multiple direction to the screen assembly in India Ahmedabad.

It is specified with Fully-accomplished machine consisting of Vibration generating base which domicile the Vibro Motor and Screening Assembly with wire mesh or perforated /slotted sheet. The Vibro Screen material provided on the screen travels on top of the screen that repeatedly passes through the screen depending upon its particle dimension as well as nature.

Vibro Screens are well-designed on the standard of Gyratory Motion and are one of the most versatile and universally acceptable machines working from corner to corner to all the spectrum of industries. Vibro Screens can also carry out various functions together with transmission of any powder or granules, sifting and grading or arrangement, removal of oversize or foreign material before packing your finished product, undersize or chips or dust removal from powder as well as granules, solid liquid separation including filtration) and removal from slurry, syrup or oils from liquid stream.
