

Manifold Blocks

Complementing the Rubbernek portfolio of Special fittings sits a range of both simple and complex Manifold blocks.

Specifically designed to meet Customers flexible or solid pipework systems, the Manifolds are designed and produced in the UK.

Commonly manufactured from both Steel and Aluminium, Rubbernek's manifold blocks can be designed to meet customer specifications or international standards such as port connections to ISO 6149 or flange connections to SAE J518.

Manifold Blocks form a major part of Rubbernek's special products range and are manufactured with the same rigorous quality and cleanliness criteria as Rubbernek's other products.
