

Agitators

Our agitated vessels are extensively used in varied chemical process. Our range of agitators are widely used in mixing vessels, chemical process reactors, mixing chambers and chemical mixing tanks. A drive assembly of agitator is fabricated as per the requirement of Motor and Gear. Foot Mounted or Flange Mounted. Gland Packing with Stuffing Box or Mechanical Seal can be fitted on shaft. Drive Assembly is provided with Double Tapper Roller Bearing, Housing, Flexible Coupling, Chuck nut, Lock nut, etc. We can supply agitator mechanisms suiting customer requirement.

Features

- Sturdy construction
- Leakage proof nature
- Temperature resistance
- Lightweight

Applications

- Pharmaceutical industries
- Biotechnology industries
- Chemical industries
- Food and beverage industries
- Pulp & paper industries
- Waste water treatment plants
- Paint manufacturing industry
