

Custom fittings

Rubbernek Fittings has over 40 years of experience in designing, prototyping and programing custom designed fittings in to production. We can manufacture from customer drawings or to whatever standards you want the end forms to conform with and whatever centre lines you require. We will design a fitting for you that will not only be the suitable for the application but also the most cost effective. We can manufacture in a variety of materials such as steel, brass, aluminium and stainless steel.

Typical applications are within agricultural and earth moving machinery, diesel engines, materials handling and hydraulic and pneumatic systems.
