

Destoners

Destoners Pressure Type

- Combined action of vibrating motion of fluidized bed creates separations of stones or any other impurities heavier than products.
- Pressure type destoner is economical and simple to operate.
- Vacuum type destoner ensures better air distribution and provides dust free working in the plant through totally enclosed aspiration system with cyclone.
- Controls of feed, Air, Deck Elevation, Pitch, Speed facilities almost complete removal of heavy impurities from products in one pass only.

Capacity Range : Upto 20 TPH.
