

Slat Conveyors

- Slat Width : 1600 mm (max)
- Length : 100 metres
- Lift : As per Requirement
- Capacity : As per Requirement

A reliable system for heavy duty conveying. Used extensively in processing and assembly line operations. Product handled include drums, auto-engines, automobile components, waste paper, boxes, crates, casting, canned food, and machine parts.

Slat Conveyors are Conveyors employing one or more endless chains to which non-overlapping, non-interlocking, spaced slats are attached. Slat conveyors consist of endless chains, driven by electric motors operating through reduction gears and sprockets, with attached spaced slats to carry objects that would damage a belt because of sharp edges or heavy weights.

The slats are either of wood or flanged metal. Slat conveyors are very useful for handling heavy loads of heated materials.
