

Dairy Conveyors

We offer a highly efficient range of Conveyor for Dairy Industry, which is highly economical and hygienic equipment. This maintenance free conveyor system is modular in design, and ensures optimum capacity production with the help of minimum down time. The modular design helps in routing through spaces available, and reaching locations at varied elevations. Equipped with multiple drive units and required conveyor length, this conveyor helps in elimination of spillages. This prevents damage to raw material and end products during conveyance. Our conveyor is highly sought after, as it is an active agent in reducing losses arising out of mishandling, improving productivity and increasing profit.
