

We make steel quick release couplings that operates simply by one hand push action and that too without twisting or wrenching. We offer steel quick release couplings and may other products. The automatic shut off of the unit during disconnection reduces wastage / fluid loss. The varieties of steel quick release couplings offered by us include double shut off couplings, single shut off couplings and straight through couplings. We manufactures broad range of Quick Release Couplings in Carbon Steel, S.S.304, S.S.316 & Brass, MS plate, SS & Aluminium etc., are required.

Size: 1/8" to 1" NB End

Connection: NPT / BST / Ferrule Fitting

Material: SS 316 / SS 304 / Carbon Steel with SS working parts

Pressure Rating: upto 10000 PSIG
