

We offer a comprehensive range of condensers that is widely used. Our **condensers** are offered in different material configurations which can be applied for different applications as per the customer requirements. Some of the industries that use these condensers are Chemical & Intermediates, Fertilizers, Food & Dairy, Organic Batch Processing & Petrochemical industry.

#### Features:

- Cost efficient
- Wide temperature tolerance
- Noiseless operation

We offer condensers that includes in CS, SS condensers. These condensers are optimally designed for efficient performance.

These are used in various industries for chemical processes. Code of manufacturing: IS2825, ASME, SEC VIII, DIV 1, TEMA, etc.

Condensers are designed and manufactured using high quality materials. The equipment is manufactured practicing good engineering methods and stringent quality measures. Material of construction of equipment can be mild steel or stainless steel depending on client's process requirements.

#### Material of Construction:

Equipment	Material Of Construction	Tube sheet	Clad
Heat Exchanger	SS 316L	186mm	
Tube Bundles	CS	126mm	
	CS + SS (410S) CLAD	51mm	10mm
	CS + SS (316L) CLAD	48mm	10mm
	CS + SS (304L) CLAD	93mm	5mm
	Admirallity Brass	77mm	
	CS + Admirallity Brass Clad	66mm	8mm
