

Pulleys

Taper Lock Pulleys

- Dual Duty grooves to perfectly match Classical V and Space saver Wedge belts.
- Standard range caters to drives up to 200 Kw with speed ratios upto 1:7.
- Shelf to shaft 'Taper Lock' bushes.
- Over 470 standard sizes to cater to wide range of requirements.
- Custom-built large pulleys in solid or split construction for higher Power Transmission.
- These metric pulleys are precision machined.

Timing Pulleys

- Outstandingly high mechanical efficiency.
- Smooth operation and constant angular velocity with no jerk or vibration.
- Operate at speeds beyond those practical for roller chains.
- Reduced belt tension. Longer drive bearing life.
- Minimal heat build up resulting in cooler operations.
- No maintenance & no lubrication required.
