

Rotary Valves

We bring to you our range of Rotary Valves which are used in factories and warehouses to transfer material without air leakage. Our range is 150nb to 650nb valve in all category valves Priced reasonably, on time delivery and ability to supply in bulk, our Rotary Valves are made of the best components and assures durability and long life. We can customize the valves to suit the needs of our clients.

We manufacture and supply Industrial Rotary Valves which are used in factories and warehouses to transfer material without air leakage. Generally, the feeder will be fitted with 6 or 8 blades close-fitting, open end rotor, providing the best possible rotating seal against air leakage, since there are always 4 blades sealing, at any time during the rotation.

Specifications

Size: From 100NB To 600NB

Material : C.I, M.S, SS
