

Nylock Nuts

Nylock Nuts : Nylon insert lock nuts as they are known are the most common and economical self locking nuts. They are elastic in nature. These nuts locks the nut in two ways. **Nylock nuts** are made from alloy steel and stainless steel. Our stainless nuts have a nylon insert to prevent the nut from getting loose. For fabricating these nuts we use finest quality raw materials and modern technology according to international standards. We are makers of best nylock nuts not only in **Rudrapur, Uttarakhand** but our nylock nuts are best in all over India in terms of price and quality. We provide **nylock nuts** that are resistant to rust and are highly durable. They are capable of sustaining exposure to harsh conditions like water and heat.
