

## Breather Valve

### Pressure & Vacuum Relief Valve

PRE'CON Pressure Vacuum Relief Valve are designed to provides protection against over pressure or over vaccum and prevents evaporation losses of products.

The PVRV maintains tight seal till the pressure or vaccum of the tank or system exceeds the set pressure or vaccum of the valve. When pressure or vaccum increases the weighted pallet lifts and breaks the seal between the seat & pallet and allows the vapor to escape.

### Vaccum Relief Valve

Vaccum Relief Valve are designed for vaccum applications only. This provides protection against over vaccum conditions.
