

Magnetic Stirrer

Supplier & Manufacturer of Magnetic Stirrer. Our product range also comprises of Scientific Equipments, Silent Generators and Hot Ovens Laboratory Equipments.

We put forth for the clients optimum quality Magnetic Stirrer, which comprises stainless steel top with electronic speed regulator. The precision-engineered stirrer is offered with a durable metal housing for easy and vibration-free operation. Besides, ventilation lowers are provided for internal cooling. It works on the magnetic field principle, with rotation of balanced permanent magnet. The rotation induces variable speed stirring action in the closed or open laboratory glass. Herein, non-magnetic field from a balanced permanent magnet reduces variable speed stirring action in closed or open laboratory glass one non-magnetic vessels

Features

- Comprises stainless steel top with electronic speed regulator
- Vibration-free operation
- Multi-position lab magnetic stirrer without heating
- Stable performance
- Reliable quality
- Low noise

Specifications

- Top material: Ceramic
- Heating temperature: Surface temperature can be up to 380
- Color: As per as client request
