

Product Range

Disintegrator Hammer Mill

X

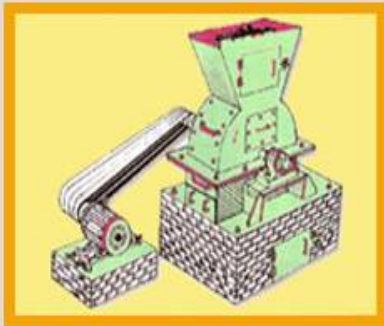

Disintegrator Hammer Mill

Used in various industries for course grinding of coal, stones, herbs and many more items. Also used for crushing coal for boilers.

- Power Consumption : 5hp to 40hp
- Capacity 250 to 3000 Kg per hour.
- Other capacities and in stainless steel body can be made on demand

Hammer Mill

X

Hammer Mill

Used in various industries to crush the coal for boilers to reduce the raw material from big pieces to small pieces.

- Power Consumption : 5hp to 40hp
- Capacity 250 to 3000 Kg per hour.
- Other capacities and in stainless steel body can be made on demand

Ribbon Blender Mixer

X

Ribbon Blender

Used in various industries to mix and blend many chemicals in equal form in pesticides, detergent powder, poultry feed & cattle feed, mosquito coil, chemical industries. Also used in spices industries for mixing of spices oil in chilli, pickle industries to mix oil, masala with pickle.

- Power consumption 3hp to 50hp
- Capacity 200kg to 3000Kg per batch
- Other capacities and in stainless steel body can be made on demand.

Spices Grinder

X

Spices Grinding Mill

- Used in spices, medicines, pharmacy, besan, bakeries to grind raw material in various mesh.
- Power consumption : 1hp to 100hp
- Capacity : 40kg to 3500kg per hour
- Other capacities and in stainless steel body can be made on demand

Suction Pulverizer

X

Automatic Suction Type Pulverizer

Used in distilleries, factories for grinding of grains like Rice, Wheat, Maize, Jwaar, Bazra. In spices industries for grinding of Haldi, Mirch, Masala, Jeera, Raie, sounf. In ayurvedic pharmacy for grinding the herbs like roots, leaves, barks, herar, baheda, amla, shikakai and many more items.

- Power Consumption : 5 H.P. to 100 H.P.
- Capacity : 200 Kgs to 3800 Kgs per hour

Important : Stones, Metals like iron, brass, aluminium particles automatically separated in grinding process by the suction system.

Rice Bran(Husk) Grinder Machine

X

Rice Bran (Husk) Grinder Machine

Used in Rice Shellers for grinding the rice bran, rice husk, in flour mills for grinding the wastage in powder form, also used for grinding rice broken, herbs, roots, leaves, spices, haldi, mirch, dhania, jeera, rai, sounf etc in chemicals industries for grinding coarse grinding of chemicals, salts sugar etc.

- Power Consumption : 10hp to 100hp
- Capacity 300 Kgs to 4500 Kg per hour.

Wheat Maize Dalia Making Machine

X

Wheat Maize Dalia Making Machine

Used for making edible dalia of wheat, maize etc. By this machine a superior quality dalia can be made. You can get dalia in round shape in various grades. Wastage of grinding material separated automatically.

- Power Consumption : 1 H.P. to 70 H.P.
- Capacity : 50 Kgs to 2300 Kgs per hour

Grinder Machine Full Jali System

X

Grinder Machine Full Jali System

Used in poultry feed, cattle feed, chemicals, sauce industries for grinding wheat, maize, jawar, bajra, grains, chemicals like salt, soda, sugar, boiled chillies, tomato, fruits etc. Used for grinding of dry as well as wet grinding, Machine have full jali system. Machine produces more production in less power.

- Power Consumption : 1 H.P. to 40 H.P.
- Capacity : 150 Kgs to 4800 Kgs per hour
- Other capacities in stainless steel body can be made on demand.

Bucket Elevator Machine

X

Bucket Elevator Machine

Used in flour mills, rice shellers, solvent plants, distilleries, factories, sugar industries, poultry feed & cattle feed plants, pesticides, dolomite food processing industries to lift the raw material for feeding other machines and to lift the fine products to storage or packing section.

- Power Consumption : 1 H.P. to 5 H.P.
- Capacity : 900 Kgs to 6000 Kgs per hour

Detergent Cake Mixer Machine

X

Detergent Cake Mixer Machine

- Used to mix Surf, Soda, Dry & Wet products.
- Power Consumption : 3 H.P. to 12.5 H.P.
- Capacity : 100 Kgs to 400 Kgs per batch.

Plouder Machine

X

Plouder Machine

- Used to make detergent cakes etc.
- Power Consumption : 5 H.P. to 20 H.P.
- Capacity : 125 Kgs to 500 Kgs per batch.

Roller Crushing Die Machine

X

Roller Crushing Die Machine

- The main use of the machine is to cutting the die shape as per our requirements.
- This machine is used for automobile componants, non oven materials,paper box cutting components, & cartoons.
- This can be used for roller cutting, fibaric cutting.

Ball Mill

X

Ball Mill

Used in Medicine, Pharmacy and Paint Industries for grinding and mixing articles in powder form.

- Capacity 20kg to 2 Ton per batch.
- Power consumption : 1 HP to 50 hp
- Other capacities and in stainless steel body can be made on demand.

Betul Nut Cutting Machine

X

Betul Nut Cutting Machines

Used in Pan masala and Guthka Industries for cutting betul nut in small pieces to mix with the Katha and other tobacco products

- Capacity 30Kg to 950Kg per hour
- Power consumption 0.5hp to 15hp
- Other capacities can be made on demand.

Centrifugal Siever

X

Centrifugal Siever

Used in roller flour mills, basen plants, chemical industries to separate the finest power dust from grinded material.

- Power consumption 1hp to 7.5hp
- Capacity 500 to 2000 Kg per hour
- Other capacities and in stainless steel body can be made on demand.

Automatic Screw Conveyor

X

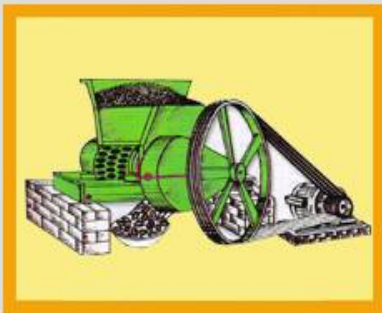

Automatic Screw Conveyor

Used in Flour Mills, Rice Shellers, Solvent Plants, Distilleries, Factories, Poultry Food Processing Industries to convey the raw material for feeding other machines and to convey the fine products to storage or packing section

- Power Consumption : 1Hp to 7.5Hp
- Capacity : 700 Kgs to 6000 Kgs per hour.

Coal Briquetting Machine

X

Coal Briquetting Machine

Used in chemicals, lime stone, bricks industries to make the coal briquettes for firing in furnaces and boilers. By this machine coal briquettes can be made in many shapes & designs from coal dust powder with binding material. Also used to crack the dry amla, reetha, harar to separate the seeds.

- Power Consumption : 1 Hp to 30 H.P.
- Capacity 3000 Kgs to 3900 Kg per hour

Machine Decoicator for Ground Nut

X

Decarticator Opener

Used in Edible oil industries to separete the seeds of groundnuts from farm fresh groundnuts

- Power consumption : 1hp to 20hp
- Capacity 8 - 150Bags per hour
- Other capacities and in stainless steel body can be made on demand.

De-stoner (stone separator)

X

Stone Seperator (De-stoner)

Used in various food industries to separate the unwanted items like stones, iron nails, straws from wheat grains, pulses and spices etc.

- Power consumption 2 to 5hp.
- Capacity 100 to 1000Kg per hour
- Other capacities can be made on demand.

Hydro Drier

X

Hydro Dryer for Namkeen Industries

Used in namkeen industry to separate the observed edible oil from fried namkeen.

- Power consumption 0.5 to 2hp.
- Capacity : 100 to 450kg per hour
- Other capacities and in stainless steel body can be made on demand.

Dhoop Batti Roller Crushing Die

X

Dhoop Batti Roller Crushing Die Machine

Used in Dhoop industries to crush the raw material in paste form before making the dhoop, batti. Also used for crack the dry amla, harar, sheekakai, reetha to separate the seeds. Machine is having heavy duty two rollers and M.S. fabricated gears & pinions.

- Power Consumption : 5 H.P. to 10 H.P.
- Capacity : 300 Kgs to 600 Kgs per hour.
- We can also make dhoop batti making machines screw type in three sizes.
