

Extruder Gear Boxes

We hold expertise in offering a broad range of Extruder Gear Boxes, which is appreciated for its dimensional accuracy, corrosion resistance and durability. These boxes are capable to withstand extreme weather conditions and transmit high torque, which is required for pressurizing and plasticising molding material. Through built in spherical roller thrust bearings, these Boxes can also bear the high axial thrust load. Our clients can also avail from us these boxes at competitive prices.

HP Gear Box

We are engaged in offering a diverse range of Gear Boxes, which are manufactured by our team using the most advanced technology. These gearboxes provide torque and speed conversions from a rotating power source to other device using gear ratios. These gearboxes offer superior performance and are therefore, preferred by one and all. Owing to their dimensional accuracy, low maintenance requirements and high durability, these gearboxes are widely appreciated by our customers in India and abroad.

Extruders Gear Box

We are providing premium quality Extruders that are known for their high resistance to corrosion and abrasion. These are made using optimum quality raw material that is obtained from our authentic and reliable vendors. Our clients have greatly appreciated and demanded the Extruders for their anti corrosive properties and long functional life. Further, we manufacture these products by our high engineering and technology methods.
