

Alloys Casting

We manufacture an extensive range of Alloy Castings, which is made using premium quality alloys. Our range of Alloy Castings helps in smooth functioning of any kind of motor in harsh conditions. Alloy Castings cater to the needs of various industries such as engineering, construction and automobile. We fabricate Alloy Castings for maximum efficiency and customize it as per the demands and requirements of our clients. Alloy Castings have an excellent feature of high conductivity coppers, which is used for their high electrical and thermal conductivities. Alloy Castings find various applications in bearings, bushings, gears, fittings and valve bodies.

Highlights

- Accurate dimensions
- High Tensile strength
- Resistance to heat
- Resistance to corrosion
- Durability
- Reliability
- Cost-effectiveness
