

Measurement Equipments

Comparator stand are extremely rugged and universally adjustable to any position. This gauge are well suited for inspection like measuring total length, width, runout of OD by using "V" block and slip gauge and line up operation any where in the shop.

The stand consists of a very stable cast iron base and an upright column with a mounting bracket that features fine adjustment using thread in the column. The base plate is made from alloy steel hardened, ground and hard chrome plated to prevent worn out and junk. Plate is serrated to prevent the work piece sticking.

| Model | Base Size | Center height | Approx Weight |
|----------|-----------|---------------|---------------|
| MCS-150 | 125 x 100 | 150 mm | 10 kg. |
| MCS-300 | 125 x 100 | 300 mm | 12 kg. |
| MCS-300H | 250 x 200 | 300 mm | 23 kg. |
