

Sluice Gate

Description

Welcome to the World of KPM Valves, Specialized in the Design, Manufacturer and Supplier of high quality water-control **Sluice Gates** and Others water control Industrial Valves for used in the Hydro Power and Industrial Sectors.

The sluice and slide gates series offered by KPM all share the same characteristics of versatility, durability, ease of installation and low maintenance. **KPM** sluice gate, **Industrial Slide Gate Valves**, Sluice Gate Valve also have a one-piece welded flange-back design which makes them more solid.

We are considered as one of eminent **Sluice Gate Valve Manufacturers** in the market. The Sluice Gate Valve, manufactured by us undergoes stringent quality check to assure flawlessness. We provide Sluice Gate Valve at the market's best rate.

Carbon steel globe valve

Features

A streamlined disc profile provides smooth flow and ensures low pressure drop which is designed for strength and deflection eliminates possibility of flutter.

Size

200 mm to 2000 mm

Specification

General manufacturing standard, IS: 3042 & 13349

Application

water.

MOC

CI/CS/SS/DI/ MS etc.
