

Turbine Blower

Precision Turbine Blowers are manufactured for high air suction need of industrial process at the same time required uniform flow of air with filtration of dust, these blowers are made with various capacity from 0.5 HP to 5 HP

For Enquiries related to Centrifugal Suction/Blow Blowers Pl. send below inputs:

- Material of construction & End use
- Volume in C.F.M. or M³/Hr.
- Static Pressure in Inches or M.M. of Water Gauge.
- Operating Temperature.
- Direction of rotation and discharge.
- Fan arrangement. (Direct/Belt/Couple drive)
- Any other accessories desired.
