

Grabbing Crane

Grabbing crane is another product offered by Auto Lift Engineering Work. This is a highly sophisticated and efficient crane well known for its speed. It is capable of lifting and moving objects even on harsh grounds. It is available in different capacities and can be moulded as per client specifications. It is highly reliable and has a great threshold of its own. Grabbing crane is a work of innovative engineering by our team and we hold pride in manufacturing such a product.

Its further features are

- Superior quality raw material used
- Incomparable in terms of work efficiency.
