

## PVC Solvent

V I P make PVC Solvent is a superior bonding agent, clear in colour, used to join PVC fittings to conduits with a quick setting time. The high bonding quality makes it a preferred choice amongst applicators to have an air tight joint for all Sizes of PVC Conduits and its fittings.

- It is advised to store in a cool place far from direct daylight.
- Shake well before using the PVC Solvent Cement.
- It is recommended to clean the surface of the conduit / fitting before applying the solvent.
- Allow a setting time of about 30 seconds.
- Avoid contact with skin.
- Solvent Cements are highly inflammable. Hence, keep away from fire.
- Close tightly after use as it evaporates.
