

Mixer Grinder

Bring home the Vijayalakshmi's sleek design mixer grinder to complete your grinding tasks with ease. Our mixer grinder package comes in with three food grade stainless steel jars: wet jar, multi-purpose jar and a chutney jar to cater various grinding needs. The jar handles are ergonomically designed to provide an enhanced grip. The exclusively crafted multi-purpose blades make the grinding everyday puree, chutney, masala and others easy. The ABS high-grade virgin of the mixer grinder makes it robust for heavy application and rough use. The high power-packed motor runs on 750 watts/550 watts models with operating voltage of 230 volts.

For added safety, the mixer is equipped with an Auto Cut Off feature, activated by an overload. The strong suction feet offer good stability to ensure the mixer grinder does not slide off during heavy-duty operations. The compact body easily sits on your kitchen platform and adds a touch of style.

Safety

Please read the user operation manual before using the cookware to avoid damage and mis-usage.
