

Rubber Sheets

FILCOMPS has a rubber compound mixing capacity of 50 tons of material per month. We are experts in formulating, mixing and testing our compounds for superior dynamic properties and high tensile and tear strengths. We have the latest mixing technology including Kneader, Mixing mill, calendaring machines and extruder for mixing and manufacturing preforms. We are capable of preparing compounds in polymers like NBR, EPDM, SBR, Neoprene, Natural, Silicone, Viton and Customised rubber parts to specific requirement meeting cost and quality as per customer specification.

Also with our completely equipped lab, we can test the properties of the compound to meet customer specifications. We can supply rubber sheets of any size and in any polymer as required along with test certificates at very reasonable prices.
