

Glass Blocks

HEMNIL TILES STUDIO is one of the nation's leading distributors of high quality, loose glass blocks. Available in various sizes, shapes and patterns, our products give homeowners and builders a multitude of options to create impressive designs with materials of the highest quality.

Glass block is a versatile material that can be used for a variety of purposes. You can use glass block to add light and illusions of space to a walk-in shower. They also work well as windows since they let light in while blurring the view from the outdoors. Other more nontraditional uses for glass block include crafts to display lights, flowers, or pictures. You can even use glass block to add unique accents to your garden by building a wall with the block.

If you are looking to use glass or acrylic block for windows, we, HEMNIL TILES STUDIO offer many choices. Glass and acrylic block awning windows open to let fresh air into your home.

Casement windows can be used anywhere in your home. Hopper windows are smaller and work best for basements or smaller spaces. Plus, the glass patterns in the block give your space an element of privacy. Picture windows are beautiful additions to foyers. They will let in light and add a distinguished look to any home.

Glass block panels are another great choice for unique home window features. We carry standard size glass block panels, custom sized non vented panels, and custom sized vented panels that beautiful wall-coverings ignite and inspire the ambience of a room, the HEMNIL team collaborates closely with everyone involved in a project, from concept to execution and delivery, to ensure a seamless and stellar result. With our Showrooms throughout ,HEMNIL provides white glove service to both the business trade and retail clients in the mid- to high-end market. Welcome to the HEMNIL TILES STUDIO!

Glass is one of the most important inventions of mankind has been reimagined and adopted in many forms throughout history. From dinnerware to packaging, from biotechnology to fiber optics and much more. Glass is one of the most essential components in doors, windows and other interior designing features such as pictures, mirrors, bottles, and frames. Adjectives like transparency, durability and insulating properties also make glass a perfect building material. However, nowadays glass blocks are getting a lot of popularity among buildings for both exterior and interior usage. Architects from all over the world are applying glass blocks to create their masterpieces. These glass blocks are earning rewards for their beauty, energy efficiency and functionality.

Glass blocks have a light permitting quality which allows light to penetrate through floors and walls thus illuminating the adjacent rooms and hallways. Glass provides privacy as well as light permitting translucence so that generous amount of light can pass through. If used as a primary exterior cladding of any building, glass block can maximize the natural light. Also, glass blocks are a highly sustainable material for construction which can be recycled and can be composed of recycled material. These glass block reduces heat and keeps the atmosphere cool. As a result of the sustainable, energy reducing nature of the material glass blocks are used in the construction of many LEED-certified structures in the United States.
