BeoLab 19

Overview

A precision powerhouse

Enhance the mood and depth of a cinematic experience with BeoLab 19's exceptional bass accuracy.

Performance elegance

BeoLab 19's distinctive lines and dynamic elegance channel the raw impact of its stunning power.

Wireless simplicity

Find the perfect spot for BeoLab 19 in your home with the freedom of wireless simplicity.

Immaculate Wireless Sound

Bang & Olufsen's stunning new Immaculate Wireless Sound concept combines design, acoustic technology and unprecedented sound quality. Enjoy groundbreaking wireless stability with sublime, seamless performance.

With Immaculate Wireless Sound, all you need is a single power cable and BeoLab 19 will find and connect to any nearby WiSA-compliant TV or A/V receiver, regardless whether it is Bang & Olufsen or not.

BeoLab 3

Overview

Impressive little numbers

Looks can be deceiving. Especially when you see BeoLab 3 for the first time. Although it is a small and compact loudspeaker, it delivers a sound that will astonish you with its power, precision and depth.

Adapting to the room

The shape of BeoLab 3 is distinctive, without any sharp edges. The acoustic lens, designed in accordance with the properties of the ellipse, contributes further to its highly differentiated look. The visual expression of BeoLab 3 changes with the many placement options, ensuring that it always fits in with your living environment, challenging preconceptions or disappearing visually

Features

- Acoustic Lens Technology (ALT)
- Adaptive Bass Linearisation (ABL)
- Room adaptation
- Thermal protection

BeoLab 17

Bang & Olufsen has revealed plans to expand its range to include wireless music streaming for the first time, with the launch of the WiSA-compatible Beolab 14 and 18 speakers, and Beolab 17 subwoofer. Whether you own a B&O TV or not, WiSA speakers will let you stream 24bit high-resolution audio files or play wireless 7.1 surround sound from a connect Blu-ray player.

The Beolab 17 effectively replaces the existing BeoLab 4000 bookshelf speakers as the go-to wireless model for anyone looking for compact yet high-powered sound. With a 6in mid-range driver and 3/4in dome tweeter, each powered by its own 160 watt class D amplifier, the Beolab 17 is incredibly powerful for its size, plus it looks every bit as stylish as we've come to expect from B&O.

Designed in partnership with David Lewis design director Torsten Valeur, each Beolab 17 is made from a polished sheet of unbroken aluminium, which has been painted and grinded to give it the appearance of raw metal. Inside, four WiSA-compatible wireless antennas ensure a strong signal, despite the all-metal enclosure. The "Broken Ice" speaker grilles are certainly eye-catching, but can be exchanged for less ostentatious white, black or blue cloth grilles if you prefer.

Features

- Adaptive Bass Linearization (ABL). Continuously adapts the bass response to the input signal, resulting in a significantly improved bass performance, without the risk of damaging the driver.
- Room adaptation. A three-position switch controls the bass response of the speaker depending on the placement of the speaker in the room.
- Line sense - auto on /off – for connecting non-Bang & Olufsen equipment

BeoPlay S8

BeoPlay S8 is a compact 2.1 stereo speaker system that can be easily connected to different audio sources. It consists of extremely compact satellite speakers and a powerful subwoofer in a configuration that opens many placement options. The product is only available in black. The subwoofer is also kept in black as the two satellite speakers from pearl-blasted, black anodized aluminium, which are moreover provided with black textile coverings.

Features

- High-quality materials in premium quality
- Flexible, intuitive and easily configurable and usable
- Exceptional acoustic performance
- Different placement options (table stands as well as wall brackets are included)
- Upgrading the BeoPlay S8 to a 4.1 or 5.1 surround sound system is NOT possible
