

Sound Systems

BeoSound Moment

Overview

BeoSound Essence is a simple, elegant one-touch music system. An entirely new way to enjoy iconic Bang & Olufsen sound, at your fingertip.

Most of the digital music we access through cloud-based music services or store on our phones and tablets stays there. Often we are too busy to find it, or to deal with the added complication of connecting it to our music system. Which means we rarely enjoy our music the way we should.

BeoSound Essence changes the game. An iconic, one- touch music system that puts the music you love at your fingertips.

Unleashing great sound is now as easy as flicking a light switch. Simply connect BeoSound Essence to any Bang & Olufsen active loudspeakers and start playing the music where you left off last time with just one touch. You can also adjust the volume, and change the track or radio channel you are listening to.
