

## Purifiner TS-Twin

The TS-Twin has the same characteristics as the TS5060PMH, but has twice the capacity. The TS unit is designed for hydraulic oils, but can clean almost any type of oil. It is intended for PRESSURE SYSTEMS or places where the cleaning unit itself is standing lower than the system it is intended to clean. The TS-Twin is connected directly to the hydraulic system.

### Applications

This unit is widely used for Azipods, Thrusters and Sterntube on board ships and boats. The unit is very location friendly and can be used on all systems where you have to collect the oil and push the oil back into the system.

### SPECIFICATIONS

- Capacity: 1 200 liters per day
- Oil volume: Up to 6,000 liters (oil in the system / tank to clean)
- Oil types: All hydraulic oils and most lubricating oils
- Viscosity: 32 - 320
- Max pressure: 200 bar with reduction valve (up to 3 bar without reduction / standard)
- Filter consumption: Normally with continuous cleaning 2-4 times a year
- Power consumption: Max. 2 600 watts, 230 volts, 16 amp. fuse
- Connection: 3/8 " BSP

Warranty: 12 months

Weight: 60 kg

Dimensions: 64 x 76 x 47 cm (H x W x D)
