

Pinch Valve

We are the chief manufacturer of Pinch Valve in Gujarat. These are distinctive kinds of valves meant for conducting the flow regulation operation by instigating pinching upshot.

We offer diverse array of these valves like our Open body pinch valves, Close Body Pinch valves and pneumatically operated pinch valves. Our valves are known for offering zero leakage smooth functionality with no blocking issues. These have self-cleaning characteristic and are ideal for harsh working conditions.

We manufacture them making use of supreme grade materials and components obtained from the most trust-worthy vendors of the market. These are made maintain the norms set by the industry applying the most modern technology.

We offer them in different specifications and also conduct quality tests on them very austerely at our quality control department and supply only when they are confirmed for their quality. We offer them at very genuine prices too.

Air Pinch Valve

We are reputed manufacturer and supplier of Air Pinch Valve used for operating pressures for controlled material depending on sleeve elastomer and valve size. Use of excessive pressure results in valve closure. Our Air Pinch Valve is known for its outstanding features like minimum frictional resistance, low maintenance and allows free flow of the product. These finds application in bottle filling, oil cut-off in CNC machines, and food & beverage dispensing.

Pneumatic Pinch Valve

Our company holds specialization in the field of manufacturing Pneumatic Pinch Valve known for reliability and leak-proof performance. It is best suited for flow control problems. Our Pinch Valves are ideal for biopharmaceutical processing, food and beverage, and industrial applications where infertility and wash down procedures is most essential. We offer these valves in customized range as per the precise needs of our customers.

Manual Pinch Valve

We present an high-class range of Manual Pinch Valve manufactured as per industrial standards. Clients can avail array of Manual Pinch Valve as per their specific requirement. These valve are highly appropriate for high abrasion resistant and long functional life. They are ideally suited for fluid control applications in chemical industries.

Solenoid Pinch Valve

Being a quality centric company, we emphasize on manufacturing and supplying Solenoid Pinch Valve suitable for application of slurries or liquids with large amounts of deferred solids. Solenoid Pinch Valve is more advantageous as it can control all the fluids that are compatible with the tubing material, protecting them from all contamination, including temperature changes
