

Laser Welding

Denmark's first and leading laser welding of molds

Power Tools ApS offers precision laser welding of mold, cut / punch, die casting and embossing tools and more. We use the latest technology and specially developed additives for the welding tasks, so the structure of the material and the welding are the same.

As the first Danish company to offer precision laser welding, we therefore have many years of experience and expertise. This means that no task is impossible. We find a solution and guarantee a high technical level and quality. Our range of work ranges from a few grams to a maximum workpiece weight of 2 tonnes.

In case of emergency, we offer welding day, night, weekends and holidays. [Contact us](#) for a non-binding offer. We are ready to help.
