

Eye Bolt

An eye bolt is a bolt with a loop at one end. They are used to firmly attach a securing eye to a structure, so that ropes or cables may then be tied to it.

Eye bolts & Eye lags are bolts or screws with a circular ring on the head. Eye bolts are commonly used to attach cables to objects.

There are types of eye bolts like wire eye bolts, forged eye bolts, forged machinery eye bolts, forged eye shoulder bolts, wire eye lag bolts, screw eyes

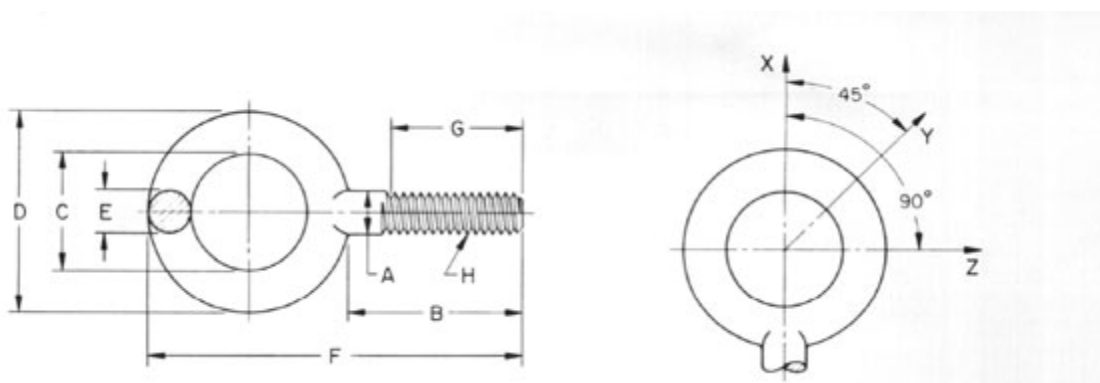

We manufacture these eye bolts for hot forged materials in stainless steel, high temperature alloys like inconel, monel, hastelloy, waspalloy, alloy 20, titanium, copper alloy, cupro nickel with superior bright surface finish.

Orders at JF Engg are guaranteed fast delivery of the Eye Bolt in the country. The main reason being we have an excellent warehousing and storage facilities for both finished and semi finished goods.

They are made ready as per the urgent requirements of the customers. The Eye Bolt are manufactured to sustain very high pressure and product warranty. In 2015 we have stocked more than 188 tons of Eye Bolt in all sizes, to cater to immediate delivery and urgent needs of the clients.
