

Metal Valve

Our product range includes a wide range of Metal Valve such as Needle Valve, Ball Valve, Brass Valve, Solenoid Valve and SS Manifold Valve.

Needle Valve:

Being the leading names in the industry, we are involved in offering a wide range of Needle Valve. These are extensively used gas control systems and are easy to use also. Offered products are highly acclaimed among our customers for their durable nature and are available in market in different sizes also. Additionally, these can be availed at industry leading prices.

Features:

- High Quality
- Shear strength
- Rugged design

Ball Valve:

We are counted amongst the reliable company, involved in offering a wide array of Ball Valve. Offered products are widely used for controlling various types of fluids in industries. We made these using high quality material and sophisticated technology that ensure their flawless finishing. We also assure safe and timely delivery of our products.

Features:

- Excellent performance
- High operational fluency
- Easy installation

Brass Valve:

To furnish the diverse requirements of our clients, we are involved in offering a wide range of Brass Valve. These are widely used for opening as well as closing of various pipes. They are dimensionally accurate in nature and are well known for their rugged construction. Besides this, these are easy to use and are also anti corrosive in nature.

Features:

- Reliable operation
- Maintenance free
- Fine quality

SS Manifold Valve:

With the assistance of our competent workforce, we have been able to manufacture and export outstanding quality SS Manifold Valve. This valve is designed and developed incorporating cutting-edge technology so that the final output meets with the international quality standards.

Features:

- Durable
- Reliable
- Long functional life

SS Casting Valve:

To furnish the diverse requirements of our clients we are involved in offering a wide range of SS Casting Valve. These are widely used for controlling liquids and have high tensile strength. These products are corrosion resistant in nature and are well known for their hassle free performance. Furthermore, we also assure to deliver a defect free range of our products in a fixed time frame.

Features:

- High durability
- Competitive prices
- Best grade materials
