

## Impact Rollers

Transfer points are critical operational areas for conveyor belts. Badly designed and improper product selection often cause unplanned shutdowns and belt breakage. Over the years, Enduride has developed innovative solutions to increase roller durability and reliability as well as specialized frame solutions to simplify maintenance and reduce downtime.

### Features and specifications:

- Dual bearing configuration (CEMA D and above)
- Exceeds the CEMA standard
- Heavy Duty Configuration
- High quality rubber, thicker than industry standards
- Availability of CEMA C, D, E, F, G
- Diameters from 4" to 10"

### OUR SPECIALIZED IMPACT FRAMES

#### **Retractable impact frame on one side**

- Retracts from one side only
- Does not require lifting the belt
- Available in all CEMA standards
- Accelerates maintenance in tight spaces

#### Other frames available

- Standard impact frame
- Retractable impact frame
- Impact frame with removable ends
- Rotary frame

#### One Man Idler®

- Only 2 screws to remove it
- 3 independent sections
- For quick and easy maintenance
