

HDPE Rollers

Features and advantages

- Prevent build-up
- Lighter than steel rollers
- Can be installed in all types of frames
- Corrosion resistant
- Compatible under magnets (stainless steel frame)
- CEMA C to E
- Belt 18 " to 84 "

Specifications

- ½" thick HDPE shell
- Inner core available in steel or aluminum (eliminates HDPE deflection)
- Machined rollers for a smoother finish (less build-up)

Options

- Aluminum core (weight reduction)
- Stainless steel shaft
- Double seal system ("Super seal")
- UHMW shell

Up to 33% lighter than steel
