

# Pneumatic Valves

Our range of **pneumatic valves, pneumatic actuator valves, pneumatic solenoid valves** and **Y type pneumatic valves** are fabricated using various graded of qualitative stainless steel and aluminum. **Known for their attributes of efficiency and durability**, our pneumatic valves can be tailored as per clients specifications.

Type	Pneumatic Actuator, Cylinder, Solenoid Valves
Material	SS 304, SS 316, Aluminum
End Connection	Screwed End

## Actuator / Solenoid Valve

We provide **actuators/ solenoid valves** which are used for controlling the flow of water, air, gases, and other materials. **Available in single action, double action, our valves are fabricated using quality tested raw materials like aluminum.** Technical specifications of Actuator / Solenoid Valve:

Type	Single Acting, Double Acting, Spring Return
Material	Aluminum
Rotation	90 Deg (Upto 360 deg on request)
Mechanism	Rack & Pinion
Solenoid Valve	2/2 Way, 3/2 Way, 5/2 Way
Media	Air, Gases, Liquid, Vacuum, Haz Chemicals

## Cylinder Operated Valve

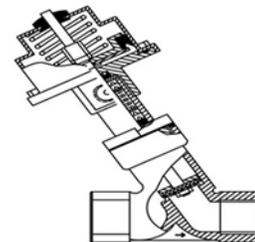

We offer **cylinder operated valve**, which are **known for their efficient performance and durable construction.** To ensure the quality of our cylinder operated valves, we make pass through stringent quality checks. Our range of cylinder operated valves are available in the following types:

- Double Acting Pneumatic Cylinder
- Single Acting Pneumatic Cylinder
- Cylinder with mid locking arrangement
- Cylinder with variable stroke
- Self Reciprocating Cylinders
- Cylinders with magnetic reed switch sensing
- Non rotating Cylinders
- Double Piston Cylinders
- Hydro Pneumatic Cylinders
- Series & Parallel Mounted Cylinders (for non-vibration & smooth travel application)
- Hydro Pneumatic Cylinders for force amplification

## Y Type Pneumatic Valve

We offer **single acting Y type pneumatic valves**, which are **known for their performance and robust construction.** Available in various sizes our range can be customized to suit the requirements of our clients. Technical specification of Single Acting Y Type Pneumatic Valve are as follows:

Type	Pneumatic Actuator, Cylinder, Solenoid Valves
Material	SS 304, SS 316, Aluminum
End Connection	Screwed End
