

Leaf Spring

Firestone Ride-Rite airbags are designed and assembled in the USA to fit between a vehicles chassis and the axle / leaf spring using brackets designed in Australia by Airbag Man, to provide levelling control, front-to-rear and side-to-side, when a vehicle is under load. The heavy duty double convoluted airbags are a two ply, reinforced rubber bellows. You can adjust for varying loads and road conditions by simply inflating or deflating, just like inflating a tyre.

Firestone Ride-Rite airbags provide extra support for leaf suspensions in:

- Light trucks
- Vans
- Utes
- 4WD's
- SUV's
- Caravans
- Motorhomes

Firestone Ride-Rite airbags will:

- Maintain a level vehicle – adjustable
- Maximise the safe load carrying capacity
- Increase vehicle stability
- Improve steering and balance
- Improve ride quality
- Greatly reduce "bottoming out"
- Keep headlights aimed on the road
- Reduce tyre wear

All Firestone products come with a lifetime warranty.
