

Hydraulic Cylinder

We are considered as one of a prominent **Hydraulic Cylinder** Manufacturers and Exporters in the global market. Our Hydraulic Cylinder is known in the market for its high efficiency and durability. Above all, we provide customized designs of Hydraulic Cylinder as per the specifications provided by the clients.

Types Available :

Single Action front flange mounted heavy-duty hydraulic cylinder: Mounted upward, this type of cylinder moves up by oil pressure and comes down by its own weight. It is fitted with seals at rod end side. Herein, the tonnage is calculated by means of rod diameter. Double Action front flange mounted heavy-duty hydraulic cylinder: Mounted down stroke and move up and down through the oil pressure. It is fitted with seals at the both end. Herein, the tonnage is calculated through inner diameter of the tube.

Propelled by :

- Hydraulics

Availability :

- 500 cylinders

Technical Specifications :

- **Diameter** : 32 to 300
- **Stroke** : 5mm to 3000 mm

Salient Features :

- Robust construction
- High performance
- Easy operation
- Low maintenance
- Competitive pricing

Used in :

- Rubber Industry
- Machine Tools Industry
- Earthmoving Industry
- Steel Industry
- Defense Industry

Client Requirement :

- Maximum tons
- Maximum Pressure
- Stroke
- Mounting details
- Threading details
