

Hydraulic Manifolds

We are identified as one of a prominent **Hydraulic Manifolds** Manufacturers in the national and international markets. Our Hydraulic Manifolds are highly efficacious that render consistent performance that too without any wear and tear. We offer Hydraulic Manifolds at the most discounted price in the Industry.

Construction based on standards :

- CETOP
- ISO

Type Available :

- Single station to five stations

Propelled by :

- Hydraulic

Availability :

- 500

Advantages :

A large number of valves are combined together which reduces the space requirement. Besides, the actuator response time can be reduced sometime time up to 50% as the flow paths are straightened as well as compressed. It eliminates the extra need of hose, fittings, tube, etc. which ultimately proves to be cost-effective.

Salient Features :

- Technically advanced design
- Long functional life
- Reduces chance of leakage
- High performance
- Low maintenance

Finds applications in industries like :

- Machine tools
- Steel
- Cement
- Rubber
- Defense
