

## Multipurpose

Dutroflex corrugated flexible pipes are made from extrusion process from LLDPE (multipurpose) or PVC (Electrical) and are ideal replacement to conduit pipes. The pipes provide strength with flexibility and are available in attractive colours. It is largely replacing conventional corrugated steel pipes, wire reinforced PVC pipes and plain rigid PVC conduit pipes.

It is another quality product from the house of Dutron, where quality & innovation is an attitude. Composition: Made from suitable plastic using specially designed moulds. Corrugations along the circumference of the pipe provide strength.

### Key Features

- Very flexible and light weight
- Better replacement to conventional steel pipes

### Applications

- For water discharge in washing machines, vacuum cleaners, wash basins, transfer of air at normal pressure in industries.

### Available sizes

- 16 mm to 50 mm I.D.
