

Hot forming

Hot forming, on the other hand, is done using 3 stations Hatebur automatic hot former with high part output up to 125 parts per minute.

In addition, we have installed a 3-station fully automated 1600 T hot/warm Forging Press from Kurimoto, Japan. This highly sophisticated and automated line is capable of producing various hot and warm forging components at a productivity of 20 parts per minute. It is backed by provisions like auto- transfer, auto-lubrication, quick die changer etc.
