

Engine Valve

We have developed engine valve for customers across the globe requiring the highest quality standards for petrol, diesel and alternative fuel engines. For all the applications from Agriculture, Automotive, Heavy Duty Trucks, Earthmoving Equipment and Marine you will find in our range. Our rich database for engine valves provides us the upper hand in terms of range and availability. We ensure the highest standard Quality and materials for all the valves manufactured.

Features of engine valve:

Valve Spring retainers are used with collets to lock the valve and hold it in accordance with the spring for the better performance. We manufacture this items in bulk quantities, it's a smaller but very important component of valve train.

- International Qualified and approved material
- Exact Dimensions for perfect fitment
- Smooth surface for functioning
- Heat , corrosion & wear resistance
