

## Strainers

Strainers manufacturer y type strainer manufacturer Duplex strainer Manufacturer Basket Strainer Manufacturer Industrial strainer Manufacturer T type strainer Manufacturer Wye type strainer Manufacturer Simplex strainer manufacturer Temporary strainer Manufacturer

**FALCON Strainers** take their name from their configuration. They are most commonly used in pressurized lines, gas or liquid, but can also be used in suction or vacuum conditions. They are intended for applications where small amounts of solid particulate are expected, and where clean-out will be infrequent. If solids will flush easily from the screen, and fluid can be exhausted to atmosphere, a blow-down valve on the drain port will allow clean-out without removal of the screen, and without interrupting the process flow.

### Industrial Strainers

We offer clients a wide range of industrial strainers to choose from including Y, T, Basket, Duplex that help in removing foreign particles in the involved flowing services. Mesh, filter screen from 10microns to 6000microns. This helps in achieving better service life of the pumps, valves and other flow control equipment or instruments. The product range offered under this category include:

### Basket Strainers

We are Leading Manufacturer,Supplier and Exporter of Basket Strainers from Mumbai-India to Globally offered by us are precision designed to meet the specific requirements of removing foreign particles in the flowing applications or services. Basket strainers flawless functionality standards also help in increasing the overall service life of the pumps, valves and other flow control equipment.

Features:

- Strainers designed to provide effective removal of any type of foreign particles
- Strainers/filters are assembled with custom build micron meshes/screens to provide in them better functionality standards
- Strainers/filters are having more filter area for free flow having less pressure drops

Specifications:

Pressure, temperature rating:50kg/cm<sup>2</sup>, 300deg C

MOC: CS / SS 304 / SS 316 / PP

Size and range: 15 NB to 1000NB

Process connection: Any international standard

## Duplex Strainer

We are Leading Manufacturer, Supplier and Exporter of Duplex strainers from Mumbai-India to Globally which are designed for use in fluid handling systems where the flow cannot be shutdown for filter cleaning. The range of duplex strainers are precision designed and constructed duplex filters ensure complete removal of any type of foreign particles from the system. Their precision functioning also help in enhancing the overall service life of the pumps, valves and other flow control instruments.

### Specifications:

Pressure, temperature rating: 50kg/cm<sup>2</sup>, 300deg C

M O C: CS / SS 304 / SS 316 / PP

Size and range: 15 NB to 200NB and mesh from 10 to 6000microns

Process connection: Any international standard

## Temporary Strainer

We are Leading Manufacturer, Supplier and Exporter of Temporary Strainers from Mumbai-India to Globally are designed for the filtration of debris, for the protection of fluid handling equipment during the commissioning and start up periods of project or plant. These temporary strainers are easily installed between two flanges. These can be supplied with spool pieces.

### Specifications:

Pressure, temperature rating: 50kg/cm<sup>2</sup>, 300deg C

M O C: CS / SS 304 / SS 316 / Special Material

Size and range: 15 NB to 1000NB and mesh from 10 to 6000microns

Process connection: Any international standard

## T- Type Strainer

We are Leading Manufacturer, Supplier and Exporter of T Type Strainers from Mumbai India are designed to remove particles from pipelines where a compact accessible strainer is needed for protection of fluid handling systems. Further the use of custom assembled micron meshes and screens also ensures in them optimum functionality standards.

Specifications:

Pressure, temperature rating: 50kg/cm<sup>2</sup>, 300deg C

M O C: CS / SS 304 / SS 316 / Special Material

Size and range: 80 NB to 1000NB and mesh from 10 to 6000microns

Process connection: Any international standard

## Y-Type Strainer

We are Leading Manufacturer, Supplier and Exporter of Y type strainers from Mumbai India are designed for long service under the exacting conditions created by high temp and pressure. Installation of the strainer before any automatic equipment will insure trouble free service and avoid costly repairs or replacements. For exceptionally fine straining, we offer perforated screen lined with related wire mesh.

Specifications:

Pressure, temperature rating: 50kg/cm<sup>2</sup>, 300deg C

M O C: CS / SS 304 / SS 316 / Special material

Size and range: 15 NB to 1000NB and mesh from 10 to 6000microns

Process connection: Any international standard

## **Simplex Type Strainer**

We are Leading Manufacturer, Supplier and Exporter of Simplex Type Strainers. The outer casing is made of fabrication or casting to withstand high pressure. The elements are generally made of perforated sheet & wire mesh of SS-304, SS-316 etc. as per application.
