

Micro Spring

We manufacture micro springs in a variety of shapes, lengths and materials. We maintain the strictest compliance to order specifications for all micro spring parts, producing precise components for even the most critical applications. Many of our micro springs are utilized in medical applications, however, with our extremely strict compliance to specifications, Our micro springs and micro-sized components are used by a variety of industries and in specialized functions.

We facilities manufacture micro compression spring, extension spring and torsion spring components. All of our parts are custom produced to meet your specifications and needs.

With state-of-the-art equipment and advanced quality control technologies, we are able to manufacture micro springs with highly-repeatable results, meeting customer tolerance requirements while maintaining manufacturing efficiency. This allows MSP to deliver the highest quality micro spring parts at low prices.

The different types of Micro springs are Micro compression, torsion & Extension springs.

We can custom manufacture any micro spring to fit your needs. As a trusted micro spring manufacturer, we have offered great prices, high quality and total customer satisfaction for more than a century. Whatever your needs – We will Do It.
