

Chemical Receivers

Manufacturers & Exporters of Chemical Receivers

Manufactured using stainless steel of grade SS304 and SS316, our receiver tanks have a capacity of 300 lts to 3000 lts. They can easily be used with air compressors. We also manufacture receiver tanks according to clients specifications and demands.

Our clients can avail from us technologically advanced array of Receivers, which is manufactured using finest grade raw material and components. Further, to ensure consistent delivery, our range undergoes rigorous quality checks and tests prior to dispatch on various parameters like durability, performance and many more. We also pay attention during the packaging of the range so as to ensure safe and secure delivery of the products at clients' destination.
