

Goods Lifts / Cage Lifts

Goods Lifts / Cage Lifts / Cage Hoists / Goods Elevator

Designed to suit client's specific requirement using superior quality raw material and bought out items.

Manufactured in capacities ranging from 0.5 tons to 7.5 tons with normally cage size of 3 mtrs. x 3 mtrs. with or without collapsible gate with required lift and upto ground + 10 floor.

Goods Lift / Cage Lift are guided in steel guide member (T-section) with hoisting and lowering operations performed by our electric wire rope hoist.

Operation is through interlocked push buttons and limit switches are provided for safety.

SPECIAL FEATURES:

- LIMIT SWITCHES To prevent over hoisting & over lowering of hook.
- Limit switch at each floor and cage doors / floor doors to avoid any accidental casualty.
- ELECTRO-MECHANIC DOOR LOCKS near the collapsible gates to ensure :
(1) Lift does not work electrically if any door is open.
(2) The collapsible gate does not open mechanically unless cage is on corresponding level.
- SPRING BUFFERS on the floor of the lift well to cushion the cage.
