

Drum Trolley

These ergonomic drum handlers allow you to move drums on and off pallets, spill containment pallets or drum dollies without the risks of injuries from manhandling. Raise drums with the ease of Power-Lift Options and move drums on and off pallets. The U- Shaped base of these drum lifters is designed to raise and place a drum at the corner of a pallet. Lift an upright drum 500mm high.

Features

- Economical and easy to use
- Drum trolley is a simple shifting equipment for inclined handling of closed top or partially filled open top drums
- The capacity ranges from 200kGS – 500 kgs
- Single person can easily load the drum and shift the load with ease
- Rigid in construction. Almost zero maintenance cost
